Durable engraved sign making Engraved Plate Replacement

TECHNICAL DATA SHEET

Revision Number. 1
Last Edited 23. august 2022

Versatile productline built with latest technology to consistently achieve superior results with exceptional quality. The continuous panel plates are printed using thermal transfer printing technology and designed to replace engraved type plates. Printing is quicker, more efficient and cost effective, while the results are durable and long lasting and the foam adhesive are high tack. Adjust very well to rough or curved surfaces. With FTI-HX ribbon a high resistance to IPA & denatured spirit is achieved. This allows the end-user to design and customize different lengths using a cutter as part of the printing process.

Identify your own customized lengths for: cabinets, patch panels, components and more.

- * High scratch and rub resistance using FTI-HX & FTI-HLD
- * Name plate quality and faster than engraving
- * Ware House Marking -
- * Professional look with sharp and crisp legends
- * Gloss finish and foamed backed adhesive for strong holding for uneven surfaces

**Resistant to weak acids, greases, oils, salt spray, cleaners, detergents, and general industrial grime.
